

## Autumn semester 2020

The Faculty of Technology, Art and Design is pleased to offer the following exchange programs in the fields of engineering and technology in Autumn 2020. The programs are individual packages and must be taken as a whole.

### The European Project Semester (EPS) – 30ECTS

EPS is a one-semester program designed to train mainly third year engineering students to carry out project work in international teams. The value of working in an international environment and at the same time improving one's English language skills cannot be overestimated in today's global economy.

Further information about the program:

### Civil and Structural Engineering – 30ECTS

This 30ECTS program is a part of the regular Bachelor in Civil and Structural Engineering, and represents the 5th semester. The 5th semester focuses on Statics, Steel and Timber design along with Architecture and design.

Further information about the program:

### Accessibility and Digital Communication – 30ECTS

The Accessibility and Digital Communication program provides an introduction to accessibility and other important topics within digital communication and the implementation of IT tools, products and services in society. The program consists of two semesters that can be taken individually or in consecutive semesters for students wanting to study at OsloMet for a whole year.
